

GS³ at Jones College Prep Presents

Materials Science and Engineering... from Nobel Prizes to Chocolate

Despite being one of the oldest forms of engineering, Materials Science and Engineering (MSE) is often overlooked in K-12 education. Come and learn about this exciting field that has produced everything from Nobel laureates to the best tasting chocolate. Through this talk, Northwestern graduate student Matthew Peters will provide an overview of what MSE is, where it is going, and how you can bring Materials Science and Engineering into your classroom.
